

Smart TV and Satellite (use large LG remote)

The LG Smart TV has access to satellite channels, Netflix, Spotify, Internet and many other connected services. It's controlled with the LG remote. In the middle row of the LG remote, there are 3 white buttons. Pressing the middle button, with the "Home" symbol will display the full range of services available. The "Back" button clears any menus. Available satellite channels can be seen by pressing the "List" button. Use the arrow keys to navigate and the "OK" button to select. To change channel, press the "P" switch.

DVD and CD Player (use Sony remote)

Turn on the TV and DVD. Press the plug button on the large LG remote (beneath the red on/off button) and select HDMI2/DVD, using the arrow key and pressing "OK". Open the disc drawer using the button on the unit or the Sony remote and place a disc in the drawer. Close the drawer by pushing the same button. The DVD or CD will now play through the TV. Follow any on screen instructions. Use the Sony remote control to operate the DVD/CD player. Do not push the disc drawer back by hand.

Soundbar (use small LG remote)

TV, DVD and CDs play through the LG soundbar, which is controlled with the small LG remote. There is also a Bluetooth function, indicated by a blue light on the speaker, which allows you to connect your devices. On your device search for LG-SK1 (94) and enter the PIN 0000 (four zeros). Press the "optical" button on the remote to reconnect the TV/DVD/CD sound. Delete the device connection on your device after use to prevent unwanted reconnection.
