

Delizia 20 BAR Coffee Machine

1. Remove the water tank, fill it to the 'Max' level, and then insert it fully into the machine with the flexible pipe inside.
2. Choose either the 2-cup or 1-cup coffee strainer. Insert into the holder and rotate until it sits flat.
3. Add ground coffee strainer just below the rim using the brown measure which also has a flat end to compress the coffee.
4. Insert the handle holder from the left and raise it until it is located, then rotate to the front.
5. Check 'Steam' and 'Coffee' switches are not pressed in. Press the on/off switch. The red light will illuminate. Wait about 2 minutes for a blue light to appear below the coffee switch.
6. Place one or two mugs on the tray under the spouts. Press the 'Coffee' switch once to start dispensing coffee and a second time to stop. The machine will automatically stop when making 2 cups.
7. To make more cups, rotate the handle holder to the left. Remove and clean out coffee grounds, wash, dry and repeat from step 1. If you're making milk foam leave the handle holder in position and move to the next step.
8. To make milk foam, first check 'Coffee' switch is not pressed in. Press the steam switch and wait for a blue light to appear. Place an empty cup under the steam spout and open the steam valve on the right side for 15 seconds to clear any water. Pour a quarter cup of cold milk into a beaker and submerge the steam pipe below the surface. Open the steam valve completely and move the cup until your milk is hot and frothy. Clean out milk residue by placing the steam pipe in a beaker of water and opening the valve. Press the steam button again to turn it off. Switch off the machine and allow it to cool.
9. Remove the handle holder, wash out the coffee grounds, remove the coffee strainer, wash and dry. Remove the outer part of the steam pipe and remove milk residue from both parts. Lift out the drip tray, wash, dry, and replace it.
