

## Washing Machine

Select the required programme, make adjustments, if required and press the Start/Pause switch. The red indicator lights on the right show progress through the cycle. Please shake sandy towels and clothes outside before washing to avoid damaging the machine. Use the white airer for drying and secured with the strap if using it outside. The previous guests washed the blue-striped pool towels the day before their departure and dried them on the airer for you. We kindly ask you to do the same.
